

## The Company

---

Aurora Energy Research provides data and analysis on UK, European, and global energy markets. Our core belief is that rigorous modelling, rooted in robust theory and supported by detailed data, yields powerful insight over the medium- to long-run. Unquestionably independent, our analysis is designed to inform our clients' critical decisions.

Aurora was founded in 2013 by five University of Oxford Professors, who have decades of experience at the highest levels of academia and energy policy. It is now a thriving, rapidly-growing company of over 70+ staff with offices in Oxford and Berlin. Demand for our services is immense, in the UK and abroad, and we expect to grow to over 100 staff in the next few years, having opened our first European office in Berlin in late 2015. Our clients include many of Europe's major energy market participants.

## Analyst/Senior Analyst

---

Based in Oxford, you will contribute to the firm, by developing analysis and conveying insights to enhance clients' decision making. You will play an active role in all aspects of client engagement: helping identify issues, forming hypotheses, conducting analysis, and synthesising conclusions into recommendations.

The successful applicants will combine technical strength with a strong track record of leadership and performance in team-oriented environments.

Successful candidates will work in a dynamic, intellectually stimulating, and demanding yet supportive environment. They will enjoy autonomy, the opportunity to substantially influence major decisions in the energy sector, and to grow into industry experts under the guidance of directors with deep experience addressing major strategic issues at the world's leading advisory firms.

The position suits a recent graduate of a bachelor's or master's programme.

### Key responsibilities

- Develop timely and rigorous quantitative analyses to enhance clients' decision making
- Work closely with our modelling team, structuring economic problems into quantifiable analyses and deriving insights from the model results
- Contribute to Aurora's product development, by identifying new opportunities and expanding our capabilities
- Engage with clients to thoroughly understand their requirements
- Communicate findings to clients

### Requirements

- First class or high second class degree from a top university in a quantitative subject (Mathematics, Economics, Physics, Engineering, Finance)
- An ability to collect, analyse and interpret complex quantitative data and information
- Evidence of strong performance in team-oriented environments
- An ability to communicate and collaborate with both technical and non-technical parties
- Demonstrated success in project management preferred
- Fluency in a second language beneficial but not essential

The successful candidates would start as soon as possible. We will review applications as they are received.

Salary will be competitive. Applicants should send their CV and a brief cover letter to [applications@auroraer.com](mailto:applications@auroraer.com). Please state your earliest possible start date.
