

The Company

Aurora Energy Research provides data and analysis on UK, European, and global energy markets. Our core belief is that rigorous modelling, rooted in robust theory and supported by detailed data, yields powerful insight over the medium- to long-run. Unquestionably independent, our analysis is designed to inform our clients' critical decisions.

Aurora was founded in 2013 by five University of Oxford economists, who have decades of experience at the highest levels of academia and energy policy. It is now a thriving, rapidly-growing company of more than 70 staff, 15 of whom are based in our European office in Berlin. Demand for our services is immense, in the UK, Germany and abroad, and we expect to grow to over 100 staff in the next few years. Our clients include many of Europe's major energy market participants.

Intern/Working Student (Berlin, Germany)

We are looking for intern(s) to work with our Berlin team for a period of 6 to 12 weeks or working student(s) for approximately 20 hours per week during the semester.. You will actively contribute to our European expansion, understanding the regulation of new markets, conducting analyses and developing modelling approaches in close collaboration with our experts.

The successful applicants will combine technical strength with a strong track record of leadership and performance in team-oriented environments.

Successful candidates will work in a dynamic, intellectually stimulating, and demanding yet supportive environment. They will enjoy autonomy, the opportunity to work on projects influencing major decisions in the energy sector, and deepen their knowledge on energy markets in a team of industry experts with deep experience addressing major strategic issues at the world's leading advisory firms.

The position suits current students or recent graduates of bachelor's or master's programmes. High-performing interns will be given the opportunity to join Aurora full-time after graduation. There are also opportunities to collaborate with us for master's or doctoral theses.

Key responsibilities

- Develop timely and rigorous quantitative analyses to enhance clients' decision making
- Work closely with our modelling team, structuring economic problems into quantifiable analyses and deriving insights from the model results
- Communicate findings to team members and clients

We offer

- a dynamic, intellectually stimulating, and supportive environment
- autonomy and the opportunity to substantially influence major decisions in the energy sector
- the opportunity to grow into an industry expert
- a fun, informal and international work culture
- a cool office in Kreuzberg with coffee, fruit and snacks delivered to the office as well as Friday evening pizza and beer with the team

Requirements

- Very good grades in a quantitative subject (mathematics, economics, physics, engineering, finance)
- An ability to collect, analyse and interpret complex quantitative data and information
- Evidence of strong performance in team-oriented environments
- An ability to communicate and collaborate with both technical and non-technical parties
- Strong interest in energy markets, previous professional or academic exposure to energy beneficial
- Very good knowledge of German and English; fluency in another European language, e.g. Dutch, French, Italian, desired

Start dates are flexible, please indicate your availability. We will review applications as they are received. Salary will be competitive. Applicants should send their CV (including university grades and, if applicable, reference letters) and a brief cover letter to bewerbung@auroraer.com.
