

## The Company

---

Aurora Energy Research is a young, dynamic and fast-growing energy analytics company. We provide optimisation solutions and data-driven analytics on European and global energy markets that helps our clients navigate the global energy transformation.

We were founded in 2013 by a group of University of Oxford academics on the premise that technological progress, and policies tackling climate change, render energy markets increasingly complex, but that this complexity yields to rigorous, sophisticated analysis and modelling.

Aurora is now a thriving, rapidly-growing company of over 90 staff with offices in Oxford and Berlin. Demand for our services – spanning subscription research and consultancy – is immense, in the UK and abroad. We currently serve over 200 of Europe’s most influential energy sector participants, and we expect to grow beyond 150 staff over the next 18 months.

## Software-as-a-Service Product Manager

---

We are now seeking an energetic manager with experience in analytics to lead, build and expand our cloud-based Software-as-a-Service offering. Alongside our consultancy and subscription research services, we are growing SaaS into a third, distinct way in which to serve our clients, offering scalability and great potential for growth. As the SaaS Product Manager, you will be critical in making it a success.

Based in Oxford, you will work closely with our modelling and software development teams to create tools to enable clients to access our optimisation models and data remotely. You will understand the commercial requirements of our clients, and lead product ideation. You will build and manage product roadmaps. You will understand technical constraints and make key decisions on design and prioritisation of features. You will track product development from origination to launch. You will develop product strategy, including marketing, positioning and messaging. You will manage client relationships and feedback. You will report to the Head of Product Development, who is an executive board member.

The successful candidate will combine excellent project management skillset, strong entrepreneurial drive and good understanding of economics, preferably of the energy sector. They will work in a creative, intellectually stimulating, and supportive environment. Our culture rewards hard work and high performance, but we love what we do and enjoy a fun, informal atmosphere. The innovative nature of the role will provide the opportunity for you to develop and broaden your skill set.

Key attributes you will possess:

- At least three years' experience, preferably in a top-tier consultancy, software company, analytics provider or energy company
- Good understanding of economics, preferably familiarity with the economics of the energy sector
- Experience with advanced analytics software, preferably optimisation models
- Self-starter, entrepreneurial mind-set, and desire to grow the business
- Intellectual curiosity and creativity in applying analytical techniques
- Top Bachelor's degree in a quantitative field, ideally also with graduate degree

Applicants should send their CV and cover letter to [applications@auroraer.com](mailto:applications@auroraer.com). We will review applications as they are received. Salary is commensurate with skills and will be attractive to candidates from leading consulting firms or industry roles.
