

The Company

Aurora Energy Research is a dynamic and fast-growing energy analytics company. We provide optimisation solutions and data-driven analytics on European and global energy markets that helps our clients navigate the global energy transformation.

Founded in 2013 by a group of University of Oxford academics on the premise that technological progress, and policies tackling climate change, render energy markets increasingly complex, but that this complexity yields to rigorous, sophisticated analysis and modelling.

Aurora is now a thriving, rapidly-growing company of over 100 staff with offices in Oxford, Berlin and Sydney. Demand for our services – spanning subscription research and consultancy – is immense, in the UK and abroad. We currently serve over 200 of Europe's most influential energy sector participants, including utilities, investors and government. We expect to grow beyond 150 staff over the next 18 months.

Analyst/Senior Analyst for Research and Publications, Berlin, Germany

Joining our office in Berlin, you will contribute to the firm by developing analysis and conveying insights to enhance clients' decision making. You will play an active role in all aspects of client engagement: helping identify issues, forming hypotheses, conducting analysis, and synthesizing conclusions into recommendations.

The proximity to key decision makers of the Energiewende in Berlin ensures our research agenda remains highly relevant for Germany. Furthermore, Berlin will be the gateway for Aurora to further European markets, offering exciting opportunities to work on international projects.

The successful applicant will join the Research and Publications team, working on our long-term market forecasts and studies on the shape of the future energy system. Topics of past studies were, among others:

- Valuing Carbon: Long-term outlook for carbon price formation and implications of the German coal exit

- The e-mobility revolution: impacts on the German power market and new business models.
- Subsidy-free renewables in the German market: Can renewables become competitive within 5 years?

Successful candidates will work in a dynamic, intellectually stimulating, and demanding yet supportive environment. They will enjoy autonomy, the opportunity to substantially influence major decisions in the energy sector, and to grow into energy experts under the guidance of directors with deep experience addressing major strategic issues at the world's leading advisory firms. The position suits a recent graduate of a bachelor's or master's programme. Exact entry position will be dependent on experience and educational level.

Key responsibilities

- Develop timely and rigorous quantitative analyses to enhance clients' decision making
- Work closely with our modelling team, structuring economic problems into quantifiable analyses and deriving insights from the model results
- Contribute to Aurora's product development, by identifying new opportunities and expanding our capabilities
- Engage with clients to thoroughly understand their requirements
- Communicate findings to clients

We offer

- A dynamic, intellectually stimulating, and supportive environment
- Autonomy and the opportunity to substantially influence major decisions in the energy sector
- The opportunity to grow into an industry expert
- A fun, informal and international work culture
- A cool office in Kreuzberg with coffee, fruit and snacks delivered to the office

Requirements

- The role requires an understanding of both the “hard” and the “soft” factors shaping energy markets. Ideally, you have either:
 - Very good grades in a quantitative subject (mathematics, economics, physics, engineering, finance), paired with a keen interest in policy developments
 - A background in political science or a related field, paired with a proven track record in quantitative analysis
- An ability to collect, analyse and interpret complex quantitative data and information
- An ability to communicate and collaborate with both technical and non-technical parties
- An ability to understand the impact of political and legal framework on the energy market
- Evidence of strong performance in team-oriented environments
- Demonstrated success in project management preferred
- Strong interest in energy markets, previous professional or academic exposure to energy beneficial
- Very good knowledge of German and English; fluency in another European language (e.g. Dutch, French, Italian, Polish, Spanish) desired
