

Aurora is looking for a

Senior Associate/Project Leader for the Italian market

to join our Berlin office

About the position

You will play a pivotal role in leading Aurora's entry into the Italian market, becoming Aurora's lead expert on the Italian power sector and developing our thought leadership, consulting and subscription product offering in this space.

In this role you will lead consulting projects, becoming the first point of contact to clients in the investor, renewables developer and utility space, and lead the development of Aurora's market research offering for the on the Italian power market. This involves keeping abreast and providing insightful analysis on key developments across the market, including consideration of how power markets will be affected by decarbonisation policies and the emergence of low-carbon technologies. Over the medium term, this role is expected to develop into independently leading Aurora's Italian business.

You will play a key role in all aspects of project and product development, as well as engagement with senior clients – managing projects, directing our ongoing research, conducting novel analyses, identifying client needs and new business development opportunities

About us

Aurora Energy Research is a dynamic and fast-growing energy consulting and analytics company. We are contributing to the global energy transition through analysis, tools and data, and inform the decisions of most major European energy market participants. Our subscription business provides data and intelligence on energy market dynamics to leading private and public-sector clients; our consulting team supports our clients' long-term strategic and investment decisions. We cover all key energy commodities, with particular focus on the power sector and low-carbon energy transformation.

Aurora was founded in 2013 by a group of University of Oxford academics on the premise that technological progress and policy interventions make energy markets increasingly complex. Our mission is to provide rigorous, sophisticated analysis and energy market modelling to address this increasing market complexity. Aurora is now a thriving, rapidly growing company of over 125 staff with offices in Oxford, Berlin and Sydney. We currently serve over 250 of Europe's most influential energy sector participants, including utilities, investors and governments, and expect to continue to grow rapidly, adding new countries and products to our portfolio.

What we offer

- A dynamic, fast thinking, and supportive environment
- The opportunity to substantially influence major decisions in the energy sector
- Direct engagement with clients through Aurora conferences, workshops and webinars
- The opportunity to grow into a publicly visible industry expert
- A fun, informal and international work culture
- Regular coaching and mentoring sessions
- An office in the most vibrant part of Kreuzberg with coffee, fruit and snacks delivered to the office
- A competitive salary

What we are looking for

- At least 3-5 years of experience at a leading consultancy, energy company, investment bank, or other knowledge-driven firm or institution (e.g. think tank, research institute)
- Very good university degree in a quantitative subject (e.g. Economics, Engineering, Finance, Mathematics, Statistics, Physics)
- Previous experience of working on energy-related projects or policy – particularly in a European power market context
- Demonstrated success in project and process management in team-oriented environments
- Ability to analyse, interpret, and derive insight from complex quantitative data and information
- Ability to communicate and collaborate with both technically and non-technically minded parties

- Self-starter, entrepreneurial mind-set, and desire to grow the business
- It would be highly advantageous to have existing knowledge of the Italian power market
- Leadership experience demonstrated by previous roles of professional responsibility
- Demonstrated success in client-facing positions
- Proficiency in English and Italian (C1 level or above); additional languages beneficial

We expect this role to be based in Berlin for approximately two years. Dependent on a successful market entry, we would afterwards consider opening a local office.

Start dates are flexible, please indicate your availability. Please submit a CV, cover letter as well as academic transcripts and work reference letters. We will review applications as they are received.
