

Aurora is looking for an

**Associate / Senior Associate for the Dutch Power Market**

to join our Berlin office

### About the position

---

Joining our office in Berlin, you will contribute to the firm by developing analysis and conveying insights to enhance clients' decision making. You will play an active role in all aspects of client engagement: helping identify issues, forming hypotheses, conducting analysis, and synthesizing conclusions into recommendations.

You will work in a dynamic, fast thinking and supportive environment. You will enjoy autonomy, the opportunity to substantially influence major decisions in the Dutch energy sector, and to grow to become a highly-qualified energy expert under the guidance of directors with deep experience addressing major strategic issues gained at the world's leading advisory firms.

You will be responsible for Aurora's product offering for the Dutch market. Together with your team, you will compile and update our power market forecast for the Dutch market. Furthermore, you work on our strategic insight reports on the Dutch market. Recent topics we have been working on include:

- Role of power purchase agreement in the Netherlands
- Ways to achieve the net zero target, and its implications for the power market
- Evaluating the future role of hydrogen in the Netherlands

In addition, you will play an active role in client engagement: identifying clients' needs, pitching our offering and answering client-specific questions in calls and in-person workshops.

The position suits a graduate of a master's program with 2+ years of relevant experience or a recent graduate of a PhD program. The exact entry position will be dependent on experience and educational level.

## The Company

---

Aurora Energy Research is a dynamic and fast-growing energy consulting and analytics company. We are contributing to the global energy transition through analysis, tools and data, and inform the decisions of most major European energy market participants. Our subscription business provides data and intelligence on energy market dynamics to leading private and public-sector clients; our consulting team supports our clients' long-term strategic and investment decisions. We cover all key energy commodities, with particular focus on the power sector and low-carbon energy transformation.

Aurora was founded in 2013 by a group of University of Oxford academics on the premise that technological progress and policy interventions make energy markets increasingly complex. Our mission is to provide rigorous, sophisticated analysis and energy market modelling to address this increasing market complexity. Aurora is now a thriving, rapidly growing company of over 125 staff with offices in Oxford, Berlin and Sydney. We currently serve over 250 of Europe's most influential energy sector participants, including utilities, investors and governments, and expect to continue to grow rapidly, adding new countries and products to our portfolio.

## What we offer

---

- A dynamic, fast thinking, and supportive environment
- The opportunity to substantially influence decisions in the energy sector
- The opportunity to grow into an industry expert and to become the key contact for a diverse range of international clients with an interest in the Dutch power sector at utilities, banks, investors, project developers and government
- Engagement with clients through Aurora conferences, workshops and webinars
- A fun, informal and international work culture
- Regular coaching and mentoring sessions
- An office in the most vibrant part of Kreuzberg with coffee, fruit and snacks delivered to the office
- A competitive salary

## What we are looking for

---

- A university degree in either:
  - a quantitative subject, coupled with a keen interest in policy developments
  - a social science, environmental studies or a related field, coupled with an interest in quantitative analysis
- A PhD degree, or 2+ years of relevant work experience
- An ability to collect, analyse and interpret complex data and information
- Strong written and verbal communication as well as interpersonal skills
- Team players who take an interest in what happens in the world around them
- Enthusiasm for energy markets; previous professional or academic exposure to energy beneficial
- Proficiency of both English and Dutch (at least at C1 level)

Start dates are flexible: please indicate your availability. We will review applications as they are received. Applicants should apply with their CV, cover letter, university grades and job references. We will not consider incomplete applications.
