

Aurora is looking for

Interns/Working Students

to join our Berlin office

About the position

Joining our office in Berlin, you will contribute to the firm by developing analysis and conveying insights to enhance clients' decision making. You will play an active role in all aspects of client engagement: helping identify issues, forming hypotheses, conducting analysis, and synthesizing conclusions into recommendations.

You would join our team

- either full-time for 8 to 16 weeks, or
- on a part-time basis as a working student for approximately 20 hours per week for a longer period.

Positions are available in both our Research & Publications and our consulting teams. In the latter, we are especially looking for candidates with a strong interest in sustainable finance and investing but will also consider applications without such focus.

You will work in a dynamic, fast thinking and supportive environment. The position suits current students of bachelor's or master's programs. High-performing interns and working students will be given the opportunity to join Aurora full-time after graduation. There are also opportunities to collaborate with us for master's or doctoral theses.

About us

Aurora Energy Research is a dynamic and fast-growing energy consulting and analytics company. We are contributing to the global energy transition through analysis, tools and data, and inform the decisions of most major European energy market participants. Our subscription business provides data and intelligence on energy market dynamics to leading private and public-sector clients; our consulting team supports our clients'

long-term strategic and investment decisions. We cover all key energy commodities, with particular focus on the power sector and low-carbon energy transformation.

Aurora was founded in 2013 by a group of University of Oxford academics on the premise that technological progress and policy interventions make energy markets increasingly complex. Our mission is to provide rigorous, sophisticated analysis and energy market modelling to address this increasing market complexity. Aurora is now a thriving, rapidly growing company of over 125 staff with offices in Oxford, Berlin and Sydney. We currently serve over 250 of Europe's most influential energy sector participants, including utilities, investors and governments, and expect to continue to grow rapidly, adding new countries and products to our portfolio.

What we offer

- A dynamic, fast thinking, and supportive environment
- The opportunity to substantially influence major decisions in the energy sector
- Direct engagement with clients through Aurora conferences, workshops and webinars
- The opportunity to grow into an industry expert
- A fun, informal and international work culture
- Regular coaching and mentoring sessions
- An office in the most vibrant part of Kreuzberg with coffee, fruit and snacks delivered to the office
- A competitive salary

What we are looking for

- University students of either:
 - a quantitative subject, coupled with a keen interest in policy developments
 - a social science, environmental studies or a related field, coupled with an interest in quantitative analysis
- An ability to collect, analyse and interpret complex data and information
- Strong written and verbal communication as well as interpersonal skills
- Team players who take an interest in what happens in the world around them
- Enthusiasm for energy markets; previous professional or academic exposure to energy beneficial
- Native level English and German, other European language skills welcomed (Dutch, Polish, Italian, or a Nordic language)

Start dates are flexible, please indicate your availability. Please attach a complete set of university transcripts to your application. We will review applications as they are received.
